#### LabVIEW. Lenguaje de Programación Gráfico

|                                                                          |           |
|--------------------------------------------------------------------------|-----------|
| <b>1. Entorno de Programación LabVIEW.....</b>                           | <b>3</b>  |
| 1.1 INTRODUCCIÓN.....                                                    | 3         |
| 1.2 PROGRAMACIÓN GRÁFICA .....                                           | 3         |
| 1.3 INSTRUMENTOS VIRTUALES .....                                         | 5         |
| 1.4 MENÚS DE LABVIEW .....                                               | 6         |
| 1.5 BARRA DE HERRAMIENTAS (TOOLBAR) .....                                | 7         |
| 1.6 PALETAS DE CONTROLES, FUNCIONES Y HERRAMIENTAS.....                  | 9         |
| <b>2. Diseño y creación de una aplicación. Instrumento Virtual .....</b> | <b>13</b> |
| 2.1 INTRODUCCIÓN.....                                                    | 13        |
| 2.2 CREACIÓN DE UN VI.....                                               | 13        |
| 2.3 FLUJO DE DATOS (DATAFLOW) .....                                      | 16        |
| 2.4 SUBVIS .....                                                         | 17        |
| 2.5 PROYECTOS .....                                                      | 21        |
| <b>3. Programación Estructurada y Tipos de Datos.....</b>                | <b>23</b> |
| 3.1 INTRODUCCIÓN.....                                                    | 23        |
| 3.2 ESTRUCTURAS EN LABVIEW .....                                         | 23        |
| 3.2.1 Estructuras iterativas.....                                        | 24        |
| 3.2.2 Estructuras de casos y eventos.....                                | 29        |
| 3.2.3 Estructuras de secuencia (Flat Sequence y Stacked Sequence) .....  | 33        |
| 3.2.4 Estructuras temporizadas. Timed Loop y Timed Sequence .....        | 33        |
| 3.2.5 Nodos de Fórmula (Formula Node) y Scripts .....                    | 37        |
| 3.2.6 Variables locales, globales y compartidas .....                    | 39        |
| 3.3 TIPOS DE DATOS.....                                                  | 44        |
| 3.3.1 Tipos Primitivos: Boolean, Numeric y String.....                   | 47        |
| 3.3.2 Arrays y Clusters .....                                            | 49        |
| <b>4. Análisis y Visualización de Datos .....</b>                        | <b>55</b> |
| 4.1 INTRODUCCIÓN.....                                                    | 55        |
| 4.2 INDICADORES DE TIPO CHART .....                                      | 55        |
| 4.2.1 Waveform Chart .....                                               | 55        |
| 4.2.2 Intensity Chart.....                                               | 59        |
| 4.3 INDICADORES DE TIPO GRAPH .....                                      | 60        |
| 4.3.1 Waveform Graph .....                                               | 60        |
| 4.3.2 XY Graph.....                                                      | 62        |

|           |                                                         |           |
|-----------|---------------------------------------------------------|-----------|
| 4.3.3     | Intensity Graph .....                                   | 63        |
| 4.3.4     | Digital Waveform Graph y Mixed Signal Graph .....       | 63        |
| 4.3.5     | Cursores en los gráficos .....                          | 63        |
| 4.3.6     | Gráficos 3D .....                                       | 64        |
| 4.4       | OTROS INDICADORES GRÁFICOS .....                        | 65        |
| <b>5.</b> | <b>Programación Avanzada .....</b>                      | <b>67</b> |
| 5.1       | INTRODUCCIÓN .....                                      | 67        |
| 5.2       | ARQUITECTURAS BÁSICAS DE PROGRAMACIÓN .....             | 67        |
| 5.2.1     | Arquitectura de Simple .....                            | 67        |
| 5.2.2     | Arquitectura de un VI General .....                     | 67        |
| 5.2.3     | Arquitectura de Máquina de Estado .....                 | 70        |
| 5.2.4     | Manejo de Errores .....                                 | 71        |
| 5.3       | NODOS DE PROPIEDAD Y MÉTODOS .....                      | 73        |
| 5.4       | MANIPULACIÓN DE DATOS .....                             | 75        |
| 5.4.1     | Type Cast .....                                         | 76        |
| 5.4.2     | Manipulación de Bytes y Bits .....                      | 76        |
